[Open Economy Macroeconomics For Developing](#)

Macroeconomics (from the Greek prefix makro-meaning "large" + economics) is a branch of economics dealing with the performance, structure, behavior, and decision-making of an economy as a whole. For example, using interest rates, taxes and government spending to regulate an economy's growth and stability. This includes regional, national, and global economies.

The consensus is that the coronavirus outbreak will cause a negative supply shock to the world economy, by forcing factories to shut down and disrupting global supply chains. This column develops a simple model to show that the spread of the virus might cause a demand-driven slump, give rise to a supply-demand doom loop, and open the door to stagnation traps induced by
