Penny trading for US Options is not supported. You will be able to submit the order but it will not receive a penny fill. The trade simulator will reject the remainder of any exchange-directed market order that partially executes. This may or may not match behavior of a real-world exchange. Market orders received while there is no quote on the opposite side will be held until the market data ...

When the study "Last Bar Close 2" gets a new bar update, variable l is still referencing the old label object created on the previous bar. This label is deleted with the label.delete(l) call. A new label is then created and its id saved to l. Using this approach there is no need to use the [] operator.. Note the use of the new Pine v4 var keyword. It creates variable l and initializes it ...
