Modern cultural anthropology has its origins in, and developed in reaction to, 19th century ethnology, which involves the organized comparison of human societies. Scholars like E.B. Tylor and J.G. Frazer in England worked mostly with materials collected by others – usually missionaries, traders, explorers, or colonial officials – earning them the moniker of "arm-chair anthropologists".

Science is the field of study concerned with discovering and describing the world around us by observing and experimenting. Biology, chemistry, and physics are all branches of science.

[Saint Augustine \(Stanford Encyclopedia of Philosophy\)](#)

Our definition comes directly from Csikszentmihalyi ' s book, ' Flow: The psychology of optimal experience ' (2008). " A state in which people are so involved in an activity that nothing else seems to matter; the experience is so enjoyable that people will continue to do it even at great cost, for the sheer sake of doing it. "

Holmes began his major work, Principles of Physical Geology, while standing watch against German firebombs in the laboratories of Durham University, where he was head of the Geology Department. Published in 1944 and in a substantially revised edition in 1965, shortly before Holmes ' s death, it is one of the most important and clearly-written books about the earth sciences. The depth and range ...
