[Rv Manual Transmission](#)

Gears in manual transmission can make clicking noises from damaged gear teeth, shaft gears or cluster gear assembly. If the noise started soon after replacing the struts, there could be a loose suspension component. Take a look under the vehicle, around the struts. If the noise is speed related--noise frequency goes up with speed--look around the wheel assemblies. There could be something ...

[Diagnosing Symptoms of a Bad Manual Transmission ...](#)

For manual transmission vehicles the clutch, flywheel, and pressure plate handle power transmission. For automatic transmission vehicles it is the torque converter that transmits the power flow. Over time parts like transmission mounts, master cylinders, slave cylinders, and more can wear out. Fluids also need routine replacement as well. No matter what
